Overall Presentation Content Comments

Well organized and balanced presentation.

I thought this was a great topic, and you did a great job describing your interest. just be careful. It would not be hard for someone to figure out who that patient was (90-year-old-female, admitted to Riverton Hosp last summer for AAD who coded and died). If you had a family member in the audience, you could be looking at a HIPAA violation. Patient identifiers extend beyond names / I thought you did a nice job setting up the controversy. // Overall, your transitions between slides were really nice.

Presentation of Clinical Data Comments

Concise presentation of published data

I thought you did a nice job with the studies. I still think the meta-analysis was really poorly done (by the authors). This can be taught to present!

Reasonable conclusions. / Good explanation of the pharmacists role.

I'm not sure the studies were strong enough to really draw conclusions from. I really liked your overview of the common products.
