

# Presenter: Aramians, Alenoush

Seminar Date: 2014-04-08

## Presenter Scores

Student Survey Data Averages							Faculty Survey Data Averages							Final Scores			
Pres. Style	Inst. Materials	Overall Pres.	Clinical Data	Conc.	Q&A	Overall Knowledge	Pres. Style	Inst. Materials	Overall Pres.	Clinical Data	Conc.	Q&A	Overall Know.	Prep.	Prof.	Att.	Total
6.73	6.93	6.85	6.86	6.9	6.82	6.86	6.13	6	5.9	6.33	6.88	6.5	6.3	0	0	0	E (46.49)

Presentation Style									
#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Moderate Pace	20	2	0	0	0	0	0	6.91
2	Thorough eye contact/ minimal reliance on notes	13	7	2	0	0	0	0	6.5
3	Displayed professionalism/ poise/ confidence/ lacked distracting mannerisms	14	7	1	0	0	0	0	6.59
4	Material presented at the appropriate level for the audience	20	2	0	0	0	0	0	6.91

## Presentation Style Comments

Good presentation style. You should look at the audience more.

Good pace. Looked a little nervous at first but seemed to settle in and talk more comfortably as the seminar progressed. Seemed to read right from the bullet points on the slide a lot; try to expand on the points a little more.

Good flow and background information.

The seminarian conducted the presentation successfully. She maintained an appropriate pace given the audience throughout the presentation. The main area for improvement that I would point to would be the use of "um" throughout the presentation and that she may be able to improve on this in future presentations

Great presentation style - just try to work on your "ums" (easier said than done, right?)

A little nervous but still well paced

Nervous energy came through at times. Remember, you've read the papers and have recently reviewed the background while most of the people in the audience are just worrying about the next upcoming exam or finding a job.

She did a good job presenting her material at a good pace. At times, she seemed a bit nervous but she was very professional during her presentation.

Great pace

Had a lot of Um's and Uh's, which were distracting. Try to relay less on notes, and have confidence in your presentation.

She had practiced her seminar previously and it was clear. She did ummm a lot.

You went a little fast during the presentation and seemed to be nervous and rely on your notes. You were professional though and presented the material at an appropriate level.

Great pace and professional throughout the seminar.

You seemed a little rooted behind the podium, which can make you appear more nervous than you may have felt.

Pace was very good. There were a lot of ughs, and ums. This may have been due to nerves but know that you are the expert and believe in your confidence.

Good pace.

Alenoush was very professional and poised in her presentation style.

Overall great presentation. One suggestion practice speaking without saying uh and um so much. :)

The speaker kept a good pace speaking throughout the presentation. This kept the audience's attention while also allowing them to think about what was being said

good presentation style. Didn't seem very nervous and I could tell you had practiced.

Good pacing. Adequate eye contact. Material was appropriate for audience. Kind of said "Um" quite a bit.

maintained eye contact and moderate pace during presentation

## Instructional Materials

#	Question	A	A-	B+	B	B-	C+	C	NA	Mean
1	Slides and handout were clear/easy to read	21	1	0	0	0	0	0	0	6.95
2	Slides and handout are devoid of spelling and grammatical errors	21	1	0	0	0	0	0	0	6.95
3	Provided orientation to charts/graphs/pictures/diagrams (if applicable)	18	4	0	0	0	0	0	0	6.82
4	Cites appropriate references/correct referencing style and emphasizes primary literature	22	0	0	0	0	0	0	0	7

## Instructional Materials Comments

Your slides and handout were excellent

I really like all of your instructional materials. Your handout was very easy to follow and had numerous appendices with graphs and charts.

Did a good job of orienting the audience to the graphs.

Her slides were very neat and clean and the handout followed in the same fashion. One thing I would like to see improved on was when there was a glitch in the audio of the video in her presentation. While this may not have been her fault and she was able to move past it and maintain the flow of the seminar without getting flustered, I think it was something that could be improved upon for future presentations.

Really liked how clean your slides were and how nice some of the charts you put together were

Very well referenced

Cite references throughout presentation at the bottom of the slides.

Her handout was very clean and easy to read.

Good references

Would have liked more visuals. With your evidence tables make sure sections aren't broken up onto different pages.

Her instructional material was easy to read.

You could try to orient your audience to your charts, pictures and diagrams a little more rather than rushing through them.

The slides and handouts were well organized and easy to follow.

Next time check your video on the computer you will be using before your presentation if possible. I would have liked to see the video, and I think you would be less stressed about things if you knew everything worked in advance.

I really liked the picture of all the different products that contain Vitamin E

Some grammar and formatting errors, especially in handout.

Alenoush used appropriate references and referencing style.

Excellent handout that was very easy to follow along

I thought the speaker's slides were very clear and easy to read

Slides were easy to follow. In your handout, maybe try not to have sections on multiple pages if possible.

Slides and handout were easy to read and follow. Little grammatical errors that weren't too distracting.

ppt and ho are easy to follow, clear and organized, all citation are provided

## Overall Presentation Content

#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Introduction, interest in topic, and outline/objectives described	20	2	0	0	0	0	0	6.91
2	Defines purpose/controversy of seminar topic clearly	20	2	0	0	0	0	0	6.91
3	Objectives clear and useful for self assessment	20	2	0	0	0	0	0	6.91
4	Appropriate background information was provided	16	5	1	0	0	0	0	6.68
5	Well organized presentations and smooth transitions (appropriate 'flow')	19	2	1	0	0	0	0	6.82

## Overall Presentation Content Comments

Good interest in the topic and your presentation had good flow

Sufficient background info was provided. In fact, it was just the right amount to teach me that Vitamin E has been an area of interest in Alzheimer's for quite some time. The objectives were appropriate and the controversy was clearly explained. Nice job on presentation content.

Good transitions from study to study.

She presented her objectives clearly at the beginning of the presentation, one thing I really liked though was that she went back to the objectives later on during the seminar to reiterate them. I thought this was useful and is not something I have seen in too many of these seminars

Liked that you included pictures, really helped the information stick. Also, loved that you had a video! I wish you had tried a little harder to get the audio in, we wouldn't have minded waiting a minute or two...maybe next time practice on the podium and see what you need to do to get it to work properly.

I think the controversy should have been summarized in a question format

Flow of presentation at times by your nervous energy.

She did a good job providing the audience with good background information. It was a good idea to have a video in her introduction, but unfortunately it didn't work.

Smooth transition. Well defined controversy

I liked how you tied in the news story about vitamin E (i.e. what our patient hears and will ask us about). Could have included more background information especially a refresher on medications used in Alzheimer's since they were used in the studies you evaluated.

I appreciated the multimedia approach the student brought to the presentation.

The presentation was a little fast at times.

The introduction was great. Could have added a little more information about Vitamin E.

Good background of vitamin E and Alzheimer's.

I liked that you introduce the controversy with how you became interested in the subject. It made it interesting and I realized the conflict right away instead of wondering what it was.

I would have appreciated additional background information, especially about current treatment options for Alzheimer's.

Alenoush provided an engaging description of her interest in the topic and provided helpful background.

Great content and smooth flow.

Controversy was clearly stated and why it's important. With herbal/dietary supplements like this, it is always of interest to us future pharmacists since they are gaining momentum in the market

I liked how you talked about the controversy after going through the studies to refresh before discussing conclusions but it might also be useful to talk about controversy at the beginning as well.

Great introduction and background that lead to the controversy.

objectives listed, background information are enough for audience to understand the topic

## Presentation of Clinical Data

#	Question	A	A-	B+	B	B-	C+	C	NA	Mean
1	Presented concise objectives, methodology and treatment for each study	20	2	0	0	0	0	0	0	6.91
2	Outcome measures were stated and described, and appropriateness was explained	17	4	1	0	0	0	0	0	6.73
3	Presented key trial results with corresponding statistical analysis	20	2	0	0	0	0	0	0	6.91
4	Student is able to determine if sample size and power is appropriate (if applicable)	17	5	0	0	0	0	0	0	6.77
5	Withdrawals and dropouts are accounted for (if applicable)	20	2	0	0	0	0	0	0	6.91
6	Provided a detailed & thoughtful analysis of study strengths and limitations	20	2	0	0	0	0	0	0	6.91

## Presentation of Clinical Data Comments

Your presentation of the clinical data was excellent

I think you covered everything about the clinical data well.

Good analysis of the studies. Next time emphasize the main outcome more.

She addressed all of the major aspects of the studies in her seminar. She was able to point out the result, their significance, as well as some of the flaws with the studies very well. She was very thorough in the data presented, but maybe in future seminars the amount of data could be trimmed down in some way

Great overall analysis of the studies. I loved that one of them was 2014! That gives you extra kudos for sure!!

Breakdown of statistical analysis was appropriate

Studies were analyzed well. Only mention positive results. In other words, emphasize when the authors found the effect of a treatment. You don't have to mention that several endpoints were not significant--it's implied by what you emphasize. You had a bit too much detail. Next year, try to emphasize the important points.

She discussed all of the results from both of her studies, which took a long time and was a bit confusing at times. Perhaps it would have been better and easier to follow if she had focused on the most relevant results - she could have explained that she was only going to focus on the most relevant results at the beginning of her seminar.

Great discussion on the strength and limitations

Maybe just focus on only the primary outcomes. I started to get confused with all the different tests/scales and which results were and were not significant.

described her studies and the primary endpoints well.

She provided a thorough and detailed analysis of the studies.

The clinical data was presented very well.

I wasn't sure which outcome your hazard ratios applied to every time. Make sure that is really clear in future presentations.

I think it was presented really well. I would just focus on your primary outcomes more than the secondary outcomes as it became confusing at times.

Power and sample size should have been discussed more thoroughly.

Alenoush provided an excellent analysis of her study strengths and limitations.

Great explanation of studies. More discussion on power of second study would be good as there was no significance found.

With the limited studies available on a dietary supplement, she did a good job presenting what data was available and how they might answer her controversial question

Try to expand a bit more on strengths and limitations.

Great analysis of the studies. Good analysis of the strengths and limitations. Maybe emphasize the studies strengths a bit more.

strength and limitations about each study are explained, statistics analysis is also provided during seminar

## Conclusions

#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Conclusions are supported by data presented in the seminar	21	1	0	0	0	0	0	6.95
2	Clinical importance and application of the study is discussed	19	3	0	0	0	0	0	6.86
3	Provided specific recommendations for clinical pharmacy practice	20	2	0	0	0	0	0	6.91
4	Discussed the role of the pharmacist and/or impact to the profession of pharmacy in regards to the use of the treatment	19	3	0	0	0	0	0	6.86

## Conclusions Comments

Your conclusions were supported by the data

Conclusions drawn were well aligned with the study results. I also really like the discussion of the pharmacist's role and very specific recommendations we can make to patients about the use of vitamin E

I liked your question at the end to get the audience involved.

She pointed out that while these outcomes were statistically significant as well as that they did not reach statistical significance. She was then able to explain what is the general benefit needed for clinical significance in this field which was beneficial

Great recommendations. Very relevant topic and something everyone in the community setting will see

I think the recommendation were conservative and considered pros and cons well

Conclusions were supported by the data.

She listed some very good roles/responsibilities of the pharmacist pertaining to her topic.

Great conclusion

Good pharmacist role section. I liked how you included non-pharm as well.

She had specific and useful conclusions.

I really liked how she incorporated a case for the clinical pharmacy practice section of her presentation and discussed how the pharmacist can impact the profession of pharmacy.

The seminarian concluded very well and discussed important roles of a pharmacist.

You had very strong recommendations. Good job!

Your conclusions followed the data really well and I thought that it reflected what was seen in the studies.

Conclusions are supported well.

Alenoush did a great job outlining the role of the pharmacist regarding her topic.

excellent example to illustrate pharmacist's role

Speaker provided strong conclusions as to whether or not this supplement would work for the stated disease state. It was supported by the studies that were presented

Good conclusions and discussing the role of the pharmacist

Conclusions were supported by the data presented. Emphasized the pharmacist's role via a case.

clinical importance and pharmacist roles are discussed during her seminar

Question Answer Session									
#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Succinctly, yet thoroughly answered audience questions	18	3	1	0	0	0	0	6.77
2	Encouraged questions and interaction with the audience	20	1	1	0	0	0	0	6.86

### Question Answer Session Comments

You answered all questions appropriately

Good job answering questions

Overall, good job at answering questions.

During the question and answer session she was asked a few questions that seemed to be very narrowly focused and may have been tough to answer for most seminarians. She was able to answer these appropriately which showed that she had thoroughly researched her topic and studies

Great job with questions and your answers! It was obvious you knew the studies and it was great that you had asked your mentor the same question an audience member had asked. It shows you have thought about the material

Presenter can have a little more confidence when answering questions

A bit more confidence when answering questions. Fake it, till you make it.

She did a good job interacting with the audience and answering questions.

I like how you encourage question and answer throughout your presentation

good job with questions

She was very knowledgeable and able to answer the questions asked.

She answered questions well but she needs to speak with more confidence throughout the presentation and when she answers questions.

The seminarian answered questions well throughout the presentation.

You were very confident in your answers.

Again, the ums and ughs showed a lack of confidence but your knowledge showed through when you answered the questions. Just need to be more confident in your ability to answer questions and present the material.

Initial response to questions wasn't very good. You seemed very stressed, but you did seem to relax as the seminar went on.

Alenoush demonstrated excellent preparation in her responses to questions.

Great responses to questions. be confident you know the most on this subject.

Speaker allowed for adequate time for questions and was able to answer them appropriately and thoughtfully.

You seemed a little bit nervous when answering questions but did a good job answering them. Just remember you're the expert in the room, no need to be nervous :)

Adequate time for questions. Presenter answered all questions well. Maybe have a bit more confidence and pause to collect your thoughts.

she encourages audience to ask question and provides her answers based on studies

## Overall Knowledge Base

#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Demonstrated knowledge of subject beyond the facts presented in the seminar	20	2	0	0	0	0	0	6.91
2	Student is able to distinguish the difference between clinical and statistical significance	18	4	0	0	0	0	0	6.82
3	Student is able to look beyond the author's conclusions and offer insight into the overall study results	19	2	1	0	0	0	0	6.82
4	Student is able to discuss conclusions in the context of previous research and in comparison to current practice/therapy	20	2	0	0	0	0	0	6.91
5	Student is able to think on his/her feet. May theorize if not sure of answer, but identifies answer as such	20	1	1	0	0	0	0	6.86

## Overall Knowledge Base Comments

Your overall knowledge was good

appeared to understand the material very well and able to answer questions in a manner that proved it

Had a good overall knowledge base.

As eluded to earlier she did a great job of conveying the statistical and clinical significance and demonstrated her knowledge of the subject during the question and answer session

You know a lot about your topic and you were very well prepared

Current therapeutic options could have been addressed in more detail

I liked your inclusion of the place in therapy of vitamin E.

She seemed to be well-prepared for her seminar and was able to answer questions that she was asked.

You did an awesome job on the question and answer section. I will suggest perhaps be more confident. You know the studies really well. Good job

Good job discussing clinical significance and coming up with your own conclusion.

She definitely is able to think on her feet, however sometimes she seemed very nervous.

She was able to think on her feet when asked questions and provide a logical answer.

The seminarian demonstrated knowledge about the subject that was beyond the seminar.

Good incorporation of a case and non-pharm recommendations.

You were able to think on your feet and I liked he pharmacist role. It really showed what I need to do in

my future career

Why were the results not clinically significant? Didn't talk much about current therapy.

Alenoush provided excellent descriptions of the statistical and clinical significance of her seminar topic.

I liked that you had two studies with different results and concluded based on combination of the two.

Speaker's ability to answer questions and the strong background provided showed that the student had a strong knowledge base on their topic

Seemed to know a good amount on the topic

Clear knowledge base as represented by answering the audience questions and little reliance on notes.

student is able to think on her feet giving answers to some difficult questions, great job

## Provide one comment on what you liked about this seminar

I liked it

I really enjoyed the topic and you did a great job presenting it. Alzheimer's is a topic that doesn't get enough attention (in my opinion) and vitamin E is a unique approach that is unfortunately not plausible.

Your analysis of the results was well done and orienting us to the meaning of the results. Good overall flow.

She addressed the statistical analysis of her studies and displayed thorough knowledge on the subject

Great job overall! Very organized and great information with a relevant and fresh topic

I think this presentation had a good amount of endpoints that are not directly observable and measurable, I think the presenter did a good job preparing to provide good background information

Good analysis of studies.

I like that she included questionnaires in her appendices. I also liked her case at the end of her seminar that summarized the pharmacists' responsibilities and information in her seminar.

Great pace

I liked how you tied in the new story about Vitamin E, because that is the kind of information that our patients will hear and come to us asking about.

I liked her knowledge and how she used multimedia.

I liked her patient case at the end

The seminar had great pace throughout the seminar and presented the studies very well.

I liked how you came back to the question and controversy at the end when you made your recommendations.

Great job! I liked the graphs/pictures you presented and that your handout was very well put together.

The topic was interesting and relevant.

I really liked the organization and visuals included in this seminar.

Overall very interesting seminar that I enjoyed.

The handout was very detailed and informative while also being easy to read and understand

I liked how you put your controversy slide after talking about the studies and before discussing

conclusions.

I liked the patient case at the end, which brought everything together.

interesting topic and enough background information

## **Provide one comment on what could be improved about this seminar**

Have more confidence

I could be way off, but when you started the seminar with your arm(s) crossed in front of you it gave the appearance of nervousness. I think you did a great job though shaking off the nerves as you got into the presentation.

Focus or emphasize the main outcomes more so than the secondary outcomes.

She will need to improve on her confidence in future presentations

In the handout some headers were on the bottom and then continued to the next page. You may want to hit enter to bring those over

I think there were a little too many acronyms

Provide a bit more energy and enthusiasm throughout your presentation. Healthcare professionals tend to think only about the science but a lot of science is debatable and must be sold. Try to combine science with a marketing aspect.

She did a very good job, but perhaps she could show a bit more confidence in herself during her presentation.

Perhaps spent more time in the studies.

Have a more narrow outcome that you are following. There were so many arms and secondary outcomes that were presented that it made it hard to follow, which ones were significant and what we were supposed to take away from the study.

I think she should feel more confident while presenting and work on saying "um" less.

It seemed long and rushed so it was hard to follow along the whole time.

Work on limiting distracting presentation mannerisms like "um."

You seemed to get more comfortable as the presentation went. Next time try to get relaxed before you start so you can have that kind of confidence throughout the entire presentation.

Just so more confidence in yourself and the your knowledge about the topic. The slides were at times very wordy, maybe decrease the amount of material on each slide.

Conclusions could have been more solid with less reliance on the author's conclusions.

Alenoush was poised and composed throughout her presentation, maybe a little less reading from the slides.

I really liked the Idea of seeing the news movie clip and was disappointed when you were unable to show it. For future presentations make sure your multimedia works prior to your presentation.

Maybe try to find more quality studies, although that might be difficult due to her topic choice

Maybe talk a bit more about why vitamin E was even tried in treating AD (mechanism of action, rationale) to help define the controversy even more.

Maybe be more confident when answering questions. Pausing to collect thoughts is perfectly acceptable.

she may emphasize a bit more about the controversy during the seminar

## General Comments

Good job

Nice presentation!

Overall good job.

The seminar as a success

Congrats on being done! You did an excellent job!

Great job!

Thanks for your work.

Great job!

Great job

Overall good job, just work on being more confident and try to eliminate saying um and uh after every other sentence.

Good first seminar.

Overall, well done. I would try to limit the amount of information on your slides next time and orient your audience to your graphs and pictures before discussing them.

Overall, the seminarian did a great job and was very knowledgeable about the topic.

Good non-pharm recommendations.

Overall, great job and really good presentation. I liked it!

Good job overall.

Great job Alenoush!

Thank you for this topic I will apply what I learned.

Overall very good presentation on a relevant topic

Good job

Overall, a great presentation. I have learned a lot.

this is a great seminar, i have learned useful information
