Presentation Style									
#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Moderate Pace	18	2	0	0	0	0	0	6.9
2	Thorough eye contact/ minimal reliance on notes	11	8	0	1	0	0	0	6.45
3	Displayed professionalism/ poise/ confidence/ lacked distracting mannerisms	18	2	0	0	0	0	0	6.9
4	Material presented at the appropriate level for the audience	19	1	0	0	0	0	0	6.95

Presentation Style Comments

Next time make more eye contact with the audience

Presentation style was good. Great pace, eye contact. Also appeared very comfortable speaking.

You're presentation flowed well and transition into the studies was good.

Great pace and great information. One thing that can be improved is less reliance on the notes as you know the information.

Felt like you didn't know the material because you read it off the slides (but I know you did!) Try to look throughout the audience

Well prepared material

Good overall flow and style. Speaker was a little soft spoken at times throughout.

Candice was very professional during her presentation and presented at a good pace.

Great pace

At first you looked at the slides a lot, I think because of nerves, but once you got more settled into the presentation you relied less on the slides/notes.

She looked someone uncomfortable presenting in front of an audience. In the future, she should work on looking at the audience instead of reading off of her slides and sounding more confident.

She went at an appropriate pace and was professional in her mannerisms.

The seminarian was professional. One room for improvement is more eye contact with the audience.

Your pace was excellent, I really liked that you didn't go too fast and you weren't too slow! You could use some more practice facing the audience. I think you knew the material, just trust yourself and face the audience more.

Candace relied minimally on her notes, but did occasionally read off the slides.

Great presentation style, very confident.

Less reliance on the slides and turning to speak more towards the audience would be a small thing you could improve in

You were very well-prepared and did a good job presenting the material without relying on your references.

Good pacing. No distracting mannerisms. Material was appropriate for audience. Maybe more eye contact with audience.

She maintained eye contact during the presentation and moderate pace

Instructional Materials

#	Question	A	A-	B+	B	B-	C+	C	NA	Mean
1	Slides and handout were clear/easy to read	17	2	1	0	0	0	0	0	6.8
2	Slides and handout are devoid of spelling and grammatical errors	19	1	0	0	0	0	0	0	6.95
3	Provided orientation to charts/graphs/pictures/diagrams (if applicable)	17	2	1	0	0	0	0	0	6.8
4	Cites appropriate references/correct referencing style and emphasizes primary literature	19	1	0	0	0	0	0	0	6.95

Instructional Materials Comments

Your handout was excellent

Handout is tidy and clean, however the font was a little small in some parts.

The chart about prescription medications was very helpful to help put your topic in perspective.

Both the slides and the handout were easy to read.

Great slides overall. Try to bullet the important information and talk about it rather than putting it all on the slide. It makes it difficult to pick out the information

The inclusion about availability of the supplement was usefull

Slides and worksheet were prepared well with no major flaws.

Her handout was very easy to read. Her slides were a bit wordy at times. She could separate the information she has onto separate slides or keep the slides wordy if she used graphics to highlight sections of the slide she was focusing on.

Slides were really easy to read which I liked

Very easy to read. Great visuals, I especially liked the sample product label.

Her handout was very clear and easy to read.

She plowed through some of her pictures and diagrams without really orienting the audience to them sometimes. Her slides and handout was clear and easy to read.

The slides and handout were easy to follow.

There were a couple of graphs in the slides that could have been included in your handout. I like being able to go back to them throughout the presentation. The graphs and slides were nice though and it flowed really well with your handout.

Candace's slides and handout were very organized and well referenced.

Easy to read slides and tables. There are some graphs from your slides I would like in the handout.

The slides and handout were very well done and easy to read

Very clean and organized handout and slides. They were clear and easy to follow. I could tell you put a lot of time into both.

Slides and handout were easy to read and quite organized. Little to no grammatical errors. Good orientation to charts and diagrams.

Slides and handout are clear, references are provided

Overall Presentation Content

#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Introduction, interest in topic, and outline/objectives described	20	0	0	0	0	0	0	7
2	Defines purpose/controversy of seminar topic clearly	18	1	1	0	0	0	0	6.85
3	Objectives clear and useful for self assessment	19	1	0	0	0	0	0	6.95
4	Appropriate background information was provided	17	3	0	0	0	0	0	6.85
5	Well organized presentations and smooth transitions (appropriate 'flow')	18	2	0	0	0	0	0	6.9

Overall Presentation Content Comments

Seminars that are about herbal products usually don't have a lot of evidence. I would suggest picking a topic that is not an herbal product

Overall content was just right. Good flow with enough background info to help us make a reasonable judgment of the studies.

The background information was applicable and thorough.

Presentation was well organized and the purpose and controversy was well defined.

Great background information on the active ingredient and highlights of the herbal supplement

The controversy was well defined but the evidence was not very recent to establish grounds for a new contribution to the topic

Interesting and relevant topic. Perhaps add a brief slide in the background comparing different weight loss agents with % of weight loss per month.

She had good background information that introduced the audience to her topic.

Showed great interest in the topic and controversy was well defined

Loved your topic interest, I don't know of anyone who has worked in the community and not had someone come up and ask about something Dr. Oz recommended.

She told an interesting story in the beginning that many of us could understand/had been in a similar clinical situation before.

She had nice transitions but tended to read her slides often.

The seminarian provided very important background information that help with the rest of the presentation.

Your background was great and that you included the actual strength available to the consumer. It helped us relate more to the studies.

I enjoyed Candace's description of her interest in her topic.

Great intro, I especially liked the background info on the Rx weight loss meds to compare with garcinia cambogia data

It is a very interesting and good topic that is relevant since patients often ask about weight loss products and we need to know how to counsel them appropriately on whether a product is likely to work or not

Very good background info! I really like the table you had with currently approved weight loss drugs. Made it easy to refresh my knowledge on them and compare to garcinia camogia.

Introduction and background were clear. The presentation flowed well enough.

Objective is clear and well organized

Presentation of Clinical Data

#	Question	A	A-	B+	B	B-	C+	C	NA	Mean
1	Presented concise objectives, methodology and treatment for each study	19	1	0	0	0	0	0	0	6.95
2	Outcome measures were stated and described, and appropriateness was explained	18	2	0	0	0	0	0	0	6.9
3	Presented key trial results with corresponding statistical analysis	20	0	0	0	0	0	0	0	7
4	Student is able to determine if sample size and power is appropriate (if applicable)	18	2	0	0	0	0	0	0	6.9
5	Withdrawals and dropouts are accounted for (if applicable)	19	1	0	0	0	0	0	0	6.95
6	Provided a detailed & thoughtful analysis of study strengths and limitations	19	1	0	0	0	0	0	0	6.95

Presentation of Clinical Data Comments

good presentation of the clinical data

Overall good job presenting the clinical data. It wasn't in the handout but I think you did address in conversation an important limitation of the trials: that they were only short term trials, and being thus they did not represent normal use in the population (most likely >12 weeks) nor lend to the safety of its use.

Good job at your analysis.

Statistical analysis and power, strength and limitation was fully explained.

I really liked how you pointed out what you liked about certain aspects of the study, it showed that you have thought about this quite a bit

Dropouts and withdrawals were presented clearly in the handout

I liked that you emphasized the effect of a diet plan on the overall results. A daily 1200 kCal is definitely a major confounder. Even with more significant results, I would question these studies because of this factor.

She did a good job identifying strengths and limitations of the studies.

Clearly stated strengths and limitations

You did an excellent job of explaining different aspects of the clinical data, instead of just stating that x happened. You talked about potential confounds and where or not something was clinically significant.

Statistical analysis fine.

Outcome measures were stated and described and provided concise objectives, methodology and

treatment.

The seminar explained the outcomes and included the need for power.

Your analysis on the external validity was done very well. I also liked the guy you spoke about clinical significance vs statistical.

Candace did a great job analyzing her studies and describing their results.

Clear explanation of the cases.

Your analysis of the clinical data was very well done for the studies that you were actually able to find on an herbal product that often doesn't see enough clinical studies conducted for efficacy

Results were presented well and were easy to understand. Both clinical and statistical significance was discussed.

Good analysis of the studies. The studies were summarized well. Study strengths and limitations were adequate.

A detailed analysis, key results are discussed

Conclusions

#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Conclusions are supported by data presented in the seminar	20	0	0	0	0	0	0	7
2	Clinical importance and application of the study is discussed	19	1	0	0	0	0	0	6.95
3	Provided specific recommendations for clinical pharmacy practice	19	1	0	0	0	0	0	6.95
4	Discussed the role of the pharmacist and/or impact to the profession of pharmacy in regards to the use of the treatment	18	2	0	0	0	0	0	6.9

Conclusions Comments

good suggestions for the pharmacist

Excellent job promoting the pharmacist's role in weight loss and suggesting that we focus on non-pharm promotion.

I liked the applicability of your pharmacist's role

I really liked how after presenting the slides, the student mentioned specific recommendations and how she will deal with patients asking for the supplement after listening to Dr. Oz.

Very clear as to where to recommend since you outlined the guidelines according to BMI. It would have been good to touch on how herbals aren't regulated as another point to consider

The best wording I've seen in conclusions regarding the studies

Analysis of both of your studies lead directly to your conclusion.

She did a great job explaining the clinical importance of the results from the study. She also listed several responsibilities of the pharmacist pertaining to her topic.

Liked the presentation of pharmacists role

I liked your very specific conclusions and they were supported by the data. You also had some really great pharmacist role recommendations that we could all start doing today with any patient that asks about weight loss.

I think it would have been helpful to delve further into pharmacists role, and truly analyze the safety concerns that may be with this product, or any unregulated supplement. If the patient was determined to take the supplement, it would have been nice to know what brands to suggest/not suggest/if any were certified.

She provided a good sense of clinical application and importance in the pharmacy field.

The seminarian's conclusion was supported by her clinical data.

I liked that you taught us how to handle the "in betweeners" and that you discussed our role thoroughly.

I really appreciated the description of the pharmacist role and recommendations.

Great discussion of role of pharmacist. I liked that it was on weight in general and not just garcinia cambogia

She provided a very clear role on what pharmacists could say when patient's ask about this product, which will be helpful in future practice

Conclusions were appropriate for the data presented.

Conclusion supported by the studies appropriately. Good discussion of the clinical role and pharmacist's role in relation to topic.

Conclusion with supporting data from both authors and seminarian

Question Answer Session

#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Succinctly, yet thoroughly answered audience questions	20	0	0	0	0	0	0	7
2	Encouraged questions and interaction with the audience	18	2	0	0	0	0	0	6.9

Question Answer Session Comments

You did a good job of succinctly answering the audience questions

We didn't ask many questions even though you offered ample opportunities, but the few you answered were done well.

There weren't many questions but you knew your material well.

She encouraged questions. However, not a lot of questions were asked but it was obvious that the student knew the subject and what she was presenting.

Didn't have many question but answered them adequately

Good interaction with the audience

You didn't get many questions but I felt that you were ready for them.

Although she didn't get very many questions, she did encourage questions during her presentation.

Encourage questions, I like that

Great job with the few questions that you had.

Could have involved the audience more.

She could have encouraged more audience interaction by promoting the asking of questions more.

The audience answered questions well.

Not a lot of questions were asked but you did give us many opportunities to ask them.

Candace did a great job answering audience questions with poise and confidence.

Could have had more interaction but probably didn't help that no professors were there to initiate discussion.

She provided ample time for questions and was able to answer the questions the audience had for her well

Had a good number of opportunities for audience to ask questions that were spread out well.

Allowed adequate time for questions and answered all questions adequately.

Encouraged questions and answered the questions

Overall Knowledge Base									
#	Question	A	A-	B+	B	B-	C+	C	Mean
1	Demonstrated knowledge of subject beyond the facts presented in the seminar	20	0	0	0	0	0	0	7
2	Student is able to distinguish the difference between clinical and statistical significance	18	2	0	0	0	0	0	6.9
3	Student is able to look beyond the author's conclusions and offer insight into the overall study results	20	0	0	0	0	0	0	7
4	Student is able to discuss conclusions in the context of previous research and in comparison to current practice/therapy	15	5	0	0	0	0	0	6.75
5	Student is able to think on his/her feet. May theorize if not sure of answer, but identifies answer as such	20	0	0	0	0	0	0	7

Overall Knowledge Base Comments

I liked your other suggestions for weight loss and I also liked that you included the price breakdown of the product

I think you knew the material though and through.

You could tell that you did your research and new your background knowledge well.

The student had a great knowledge on the material she presented.

Liked how you pointed out whether or not the statistical significance meant much clinically. Really made some excellent points

The tone of the conclusion were very objective

Overall, I felt that you had a good handle on the topic. Perhaps, just add a brief slide that compares G.cambogia to other weight loss treatments.

Candice was very knowledgeable about her topic. It was clear that she was well prepared for her seminar.

Great overall conclusion

Very strong knowledge base, I really like some of the extra tid bits you had for us that weren't on the slides or handout, which really helped us understand the results of your studies and if they are clinically meaningful.

She clearly knew her topic very well.

She could have discussed conclusions in the context of previous research a little more. This may have been due to a lack of previous research available.

The seminarian demonstrated thorough knowledge of the topic.

You had great knowledge about the subject and the nonpharmacological plans needed for obesity/weight loss

Candace did a wonderful job assessing the clinical significance of the findings of her studies.

You could tell you knew a lot more than you presented. Your hard work payed off.

Overall knowledge base was very strong as indicated in her ability to answer questions from the audience and strong background that was provided

You were able to analyze data and come up with your own final conclusion based on the studies you presented. Good job!

Good knowledge base. Presenter was able to think on her feet and conclude accordingly.

Overall knowledge is strong and answered question on her feet

Provide one comment on what you liked about this seminar

I liked the cost comparison

The topic is very relevant to the average patient. Obesity and overweight is a major concern and contributes to other comorbidities. These patients will often try anything and it is important to be able to take a stance and back it up with study information. Good work.

I liked how you came up with this topic and how it is applicable to retail pharmacy. Your slides were clean and well organized.

I really liked specific recommendations on pharmacist's role and how you relate to patients asking supplements after listening to Dr. Oz.

Great job overall, very clean.

Interesting topic, specific well thought conclusions

Well researched and organized. Relevant topic.

I liked her slide and section in her handout that listed unanswered questions pertaining to her topic. I also liked that she included a patient case to summarize information at the end of her presentation.

Great pace

I really loved the chart you had of the FDA approved prescription medications for weight loss and what sort of weight loss we can expect with them. I think it was a great reminder to everyone that they have a fairly small weight reduction. It really helped set us up to look at and critically evaluate the studies you were presenting. Great job!

She had very clean slides and a very easy to read handout

I liked her topic.

The seminarian provided a clinically relevant conclusion that helps the audience apply the results to practice.

I liked that you had the necessary amount of information to orient us to this product and that you spoke about important clinical data!

I really liked the topic, this is a very timely herbal topic.

great topic, I found it very interesting and applicable

Her presentation of data and slide set were very well done

I liked how you had a case for audience participation.

I liked the clinical case at the end that brought together the message of the presentation.

Interesting topic about herbal product

Provide one comment on what could be improved about this seminar

I didn't think the case was needed

I know it's a technicality, but as I already stated, make sure the font size is large enough throughout your handout.

Try to rely less on your slides.

Relying less on the notes and having more eye contact with the audience is one area that can be improved.

Would have liked a topic with more recent studies and try to work on your skills presenting to an audience

I already mentioned it

Use a bigger font on some of your slides (e.g. study design slide, result tables). Several of your slides had a lot of text. A good rule of thumb is that less is more. Also, at times you were a little hard to hear.

She could work on making her slides more succinct. Also, she was a bit quiet and could work on being a little louder when presenting.

Nothing really

Have more confidence in yourself and your presentation. You really knew your material and once some of the nerves passed you sounded much more confident. I know public speaking is hard and I have to work at not getting nervous as well.

Student needs to work on her presentation skills and not reading off of the slides but facing the audience.

She could have read from her slides less.

The seminarian could have made for eye contact with the audience.

Again just speak to the audience more, it will help show us the confidence you have in the subject.

Candace was very well prepared and knowledgeable about her topic, and maybe could work on communicating her enthusiasm about her topic to the audience to help make the presentation more engaging.

could interact with the audience more, if they don't ask questions you ask them a question could be a

method you try in the future.

Talk more towards the audience and less of reading or looking at the slides

Try not to look at your slides as much. I could tell you knew your info really well and didn't really need to look at them.

Maybe more eye contact with the audience and less slide reading.

More detailed background information, such as mechanism of actions

General Comments

Great job

Overall very well done.

Overall good job and a nice, clean handout.

Great presentation. I learned that a lot of patients are asking for this supplement.

Congrats on being done! Great job

Good job, I'm sorry faculty missed to see a portion of your presentation...

I enjoyed your seminar discussion. Thank you.

Well done Candice!

Great job

Great job! I really enjoyed your seminar.

well researched.

Good presentation. Maybe try practicing it out loud a little more next time to become more comfortable with the material to the point where you don't have to read your slides quite as much.

Overall, the seminarian was very knowledgeable about the topic.

Overall, great job! You did extremely well and this was a very interesting subject.

Great job Candace! I loved how key points from herbals class were pulled into the seminar presentation as appropriate.

Very enjoyable and great treats.

Overall a very good presentation on an interesting topic that is likely to be important to us in the future

You did a great job presenting your studies and conclusions. Herbal topics are sometimes difficult because there aren't usually very many high quality studies. Well done.

Overall, a great presentation. I have learned a lot.

Useful information was obtained from this seminar
