Instructional Materials Comments

Nice way to make very detailed charts from studies directed to the info you wanted to audience to focus on. Could have added more charts/graphs to help break things up - consider this next time.

There were a few places with slide errors -- due to poise these were well smoothed over. Also, it would be useful to have the handout a bit more tuned to the timing and flow of the seminar.

Overall Presentation Content Comments

Obvious practice in working on flow and transitions. Grabber did the trick. Very specific background, objectives to support narrowly defined seminar topic.

THe use of internal quizzes was very good, and overall the seminar was very well timed in terms of how the information was presented. You kept my attention.

Presentation of Clinical Data Comments

Not so fantastic studies - but evaluated well and limitations outlined.

Only comment would be to remove data that is not important from the slides, such as within table.

I found the law info (and that most students were unaware of the law) very powerful. Specific recommendations based on studies presented and original thought.

The application and pharmacists' role section was very good.

I know Halee was anticipating more questions - next time work on ways to engage audience when your expectations of questions are not achieved. Ability to discuss post seminar demonstrated depth of knowledge in this area.

This was fine. Internal questions took care of this well.

no concerns. Next work on changing things up on the fly.

Good.

Overall Comments

An excellent first seminar - which originates from a clear and specific topic. Continue to work on transitions, and "telling the story". Consider ways to make recommendations for pharmacists detailed and actionable.

This was a very poised and well done seminar. Because of your presentation style, I was completely convinced of the validity of your conclusions.
