Presentation Style Comments

Did not read from her notes but she did stand behind the computer screen at the podium. She should work on moving away from the podium to engage her audience

Good pace and level of detail for the audience. It would have been nice to see you step out from behind the podium to "engage" with your audience; and speaking with more confidence would probably enable you to project your voice better.

Instructional Materials Comments

Excellent graphics. I appreciated that she used pictures that related to hear subject as transitions between sections of the presentation

Slides and handout were effective, not cluttered. I liked the comparison chart in the handout. That is the kind of information that will lead people to file the handout for future reference. Using a pointer would have helped you draw attention to specific data on charts/graphs you wanted to highlight.

Presentation of Clinical Data Comments

did a good job of recognizing the limits of the studies that have been done and provided a critical evaluation of the available data

Good presentation of study methods and results. For the first study, absolute pregnancy rates would have been helpful to better understand the risk of pregnancy in the study population before considering OR with overweight/obesity.

Overall Knowledge Base Comments

Excellent presentation of the subject and the limited clinical data that is available. Her conclusions and recommendations from these studies were appropriate

You did a good job answering questions and considering how you would apply this knowledge to clinical practice. You really seem to know the content, and were good at stating where/how this data can support clinical decision-making.

Overall Comments

Excellent job. I appreciate that she picked a topic that has some very real controversy associated with it. She did a good job of framing the complexity of the problem and the very human aspects of the topic

You gave a very good presentation - content was very solid. My main suggestion is to work on presenting with more confidence; in almost all cases you will know the content better than anyone else in the room. (And remember to try to "have fun" and enjoy the opportunity you've been given to share this knowledge.)
